Debian build dependencies

by Valteri Rahkonen

Revision history

Version:	Author:	Description:
2004-04-29	Rahkonen	Changed title
2004-04-20	Rahkonen	Added introduction, reorganized document
2004-04-19	Rahkonen	Initial version

Table of Contents

1. Introduction.....	1
2. Required source packages.....	2
2.1. Build dependencies	2
2.2. Misc packages	4
3. Optional source packages.....	5
3.1. Build dependencies	5
3.2. Misc packages	19
A. Required sources library dependencies	21
B. Optional sources library dependencies	22

Chapter 1. Introduction

Debian source packages are used to build Debian binary packages. Debian package building requires compiling source package to binary package and thus tools and libraries that compilation uses must be present in the system. Thus building a Debian binary package depends on extra tools and libraries.

This document contains information about Debian source package build time dependencies. Its purpose is to provide useful information for Scratchbox development team about which tools should be included on Scratchbox Debian development kit. Debian devkit has been divided further to docctools that contains document generation tools, rootstrap that contains libraries and actual Debian devkit that contains build tools specific to Debian (for example dpkg).

This document has been divided to required packages (Debian base sources) and optional packages. Library dependencies are outside of this document's scope and they are provided as an appendix.

Chapter 2. Required source packages

Following packages are marked as required ('Priority: required') in Debian Sources file (contains Debian source packages). Debian base is compiled from these packages.

```
acl
attr
base-files
base-passwd
bash
coreutils
db1-compat
db3
debianutils
diff
dpkg
e2fsprogs
findutils
gcc-3.0
gcc-3.2
glibc
grep
gzip
hostname
libcap
mawk
modutils
ncurses
pam
perl
procps
sed
shadow
slang
sysvinit
tar
util-linux
zlib
```

2.1. Build dependencies

Following packages are marked as a build dependency for required source packages. Packages that have hit count 0 are required because some binary package requires them.

```
debhelper 20
gettext 12
texinfo 12
autoconf 8
bzip2 6
libtool 5
texi2html 4
autotools-dev 4
binutils 4
automake1.7 4

```

2.2. Misc packages

Following packages are the dependencies that one of needs to be installed.

```
coreutils or fileutils 82
iputils-ping or ping 4
libwww0 or libwww-ssl0 4
jade or openjade 3
debconf-i18n or debconf-english 1
```

Chapter 3. Optional source packages

This document does not provide a list of optional packages ('Priority: optional' in Debian Sources file) because list is very long. However their build dependencies are provided in next chapter.

3.1. Build dependencies

Optional packages build dependencies provide useful information for tools that are needed inside Scratchbox. Following table lists build dependencies and their hit count for optional packages. Packages that have hit count 0 are required because some binary or library dependency requires them and thus have no references in sources.

```

3.2. Misc packages

Following packages are dependencies that one of needs to be installed.

```
xlibmesa3 or libgl1 128
libqpel or libqpel-sharp or libqpel-ipaq 112
mono-jit or cli-virtual-machine 10
whiptail or dialog 5
iamerican or ispell-dictionary 4
```

automake or automake1.5 4
libpng12-0-dev or libpng-dev 3
spell-en or aspell-dictionary 2
lyx-xforms or lyx 2
tlas3-base-dev or liblapack-3.so 1
macs21-nox or emacsen 1
estvox-kallpc16k or festival-voice 1
ortunes-min or fortune-cookie-db 1
hc6 or ghc5 or ghc4 or nhc98 or hugs 1
gimp-perl or gimp1.2-perl 1
ipadic or chasen-cannadic 1
libdb3+-dev or libdb+-dev 1
libgdchart-gd1-noxpm-dev or libgdchart-gd1-dev 1
libgnutls-dev or libgnutls5-dev 1
libjpeg-progs or libjpeg-gif 1
monodoc-base or monodoc-browser 1
xscreensaver-nognome or xscreensaver 1
debconf-i18n or debconf-english 1
libxerces21c102 or libxercesicu21c102 1
libxerces23 or libxercesicu23 1
libzephyr3 or libzephyr3-krb 1
pd or puredata 1

Appendix A. Required sources library dependencies

Following libraries are needed for building required source packages.

```
zlib1g-dev 4
libncurses5-dev 4
libc6-dev 2
libattr1-dev 2
libpam-runtime 1
libacl1-dev 1
libdb4.0-dev 1
libcap-dev 1
libgc-dev 1

```

Appendix B. Optional sources library dependencies

Following libraries are needed for building optional source packages. Only libraries that have more than ten references are included here because full list is really long.

```
xlibs-dev 745
zlib1g-dev 321
libncurses5-dev 295
libgtk1.2-dev 263
libgtk2.0-dev 258
libglib1.2-dev 160
libjpeg62-dev 155
libssl-dev 153
libxml2-dev 150
libreadline4-dev 125
libgnomeui-dev 120
libglib2.0-dev 119
libsdl1.2-dev 108
libgnome-dev 107
libqt3-qt-dev 102
libxaw7-dev 99
kdelibs4-dev 87
libfreetype6-dev 80
libpng12-dev 75
libpam0g-dev 74
libpopt-dev 67
libtiff3g-dev 66
libqt3-compat-headers 64
libvorbis-dev 59
libesd0-dev 59
libpcap-dev 58
libglade2-dev 57
libgdk-pixbuf-dev 52
libpng3-dev 50
libxml-dev 49
xlibmesa-g1-dev 48
libdb3-dev 46
libsdl-mixer1.2-dev 46
libgnome2-dev 44
libgdbm-dev 44
libasound2-dev 43
libgconf2-dev 43
libpcre3-dev 42
libaudiofile-dev 40
libmp3-dev 40
xlibmesa-glu-dev 40
libmysqlclient10-dev 39
xlibmesa-dev 38
```

libldap2-dev 37
libgnomevfs2-dev 37
libsdl-image1.2-dev 37
libxml-parser-perl 36
libexpat1-dev 35
libc6-dev 34
